Track – Pac

Completely traceability package

- Track-Pac combines a pre-built application using Plantwatch **“Do-it-yourself”** software with the included hardware to perform customizable plant floor functions.
- Fully configured to perform data collection, Quality control, traceability, and other MES functions.
- Permanent full development license with no annual fees.

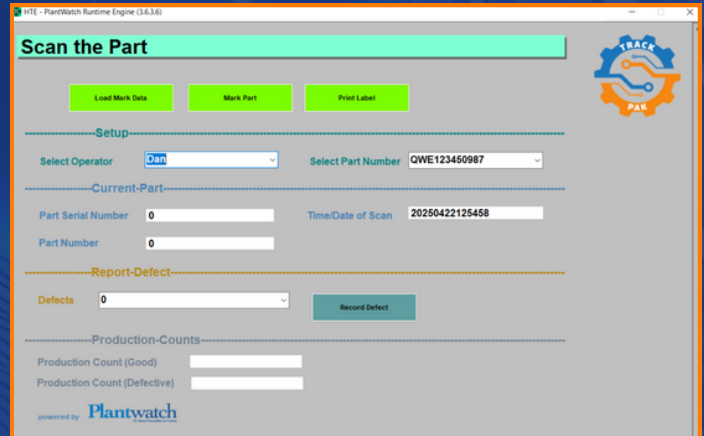

Included:

 PLANTWATCH Traceability Application	 LASER MARKER Serialized part ID	 LABEL PRINTER Zebra Printer	 SCANNERS Handheld and fixed bar code readers	 TRACK-PAC CLIENT Full control client
---	--	--	--	---

Track-Pac's traceability application is easily modified by our customers with one day of included training.

Features that Track-Pac offers out of the box:

- Serial and batch traceability
- Error-proof of process and component assembly
- Quality control
- No scripting required
- Work flow management
- Job tracking
- Operator Work directions
- Bi-directional connection to other software, databases, and PLCs
- Customizable Graphical user interface
- Easily extend the application using fill-in-the-blank forms and simple logic to perform most SCADA and MES functions.
- **Defect Tracking:** Track, control, and manage defects when quality is mission-critical
- **Packout and Labeling:** Facilitate proper parts labeling and packing
- **Data Collection:** collect, Alarm, report, and react to reliable data

Included in the base Track-Pac package:

- Track-Pac traceability application built with extensible PlantWatch software. All included hardware components interfaces configured
- Permanent PlantWatch MES development/runtime license with one client
- 30-watt Class 1 Fiber Laser
- Datalogic hand-held scanner
- Fixed mount Omron smart camera
- Zebra thermal transfer label printer
- Windows computer with touchscreen
